#### CAMELLIA

Gerbing, G. G. CAMELLIAS. St. Augustine, Record press, 1945. 97.31 G31 Ser.2

"Here is the story of camellia selection and outdoor culture as seen by a  
man whose interest in these storied shrubs, both as hobbyist and professional  
grower, is so keen that he has now fifteen Florida acres devoted entirely to  
them and to azalias. The most outstanding feature of the book is the series  
of excellent, well displayed full color plates of upward of 100 choice named  
varieties."—N.Y. Herald Tribune.

#### COOKERY

COUNTRY LIFE

Bromfield, Louis. PLEASANT VALLEY. N.Y., Harner, 1945. 300 p. 31.3 B78

An appealing and delightful account of this noted writer's happy experiences as an Ohio farmer.

"Gathering the right young men about him, Bromfield set up something in the nature of a collective farm. Louis was to be the State and furnish the capital. Book publishers and Hollywood were to stake out their vicarious claims on respectability by providing the wherewithal. It was the old pen that was to drive the tractor and the plows. And it has worked, worked because the highest intelligence was applied to the problem. No gentleman farmer this, no fancy cattle in plush stalls; it is the elegant Louis with earth beneath his fingernails and an alert vision pounding away in his head."--N.Y. Herald Tribune.

IF YOU'RE THINKING OF A LITTLE PLACE IN THE COUNTRY. U.S. DEPT. AGR., AIS-SERIES No. 14. Washington, 1945. 12 p. 1 Ag84A1

McKimmon, J. S. WHEN WE'RE GREEN WE GROW. Chapel Hill, Univ. of N. C. press, 1945. 353 p. 275.2 M21

Curb-markets and canning clubs; house-building and hat-making, Virginia Reels and country fairs--the work and play, the fun and discouragement of farm life in the South are found in this story of home demonstration work in North Carolina.

"The first state home demonstration agent of North Carolina, in a swift-running record, tells how such work has gone on in the state since 1911, and gives, along with it, a practical example of what people can do, with the right stimulus and support, for themselves and the community."--N.Y. Herald Tribune.

## LUMBERING

Jenson, V. H. LUMBER AND LABOR. N.Y., Farrar & Rinehart, 1945. 314 p. 283 J45.

American labor has been on the march in recent years. Its ultimate destination is still somewhat obscure, and the war--in the outcome of which labor has so much at stake--is critically affecting the speed and direction of its movement. Dr. Vernon H. Jenson's volume is the first full account of Twentieth Century labor in a field which, for all its fascination, has been little studied.—Book Jacket.

## MISSISSIPPI RIVER DELTA

Kane, H. T. DEEP DELTA COUNTRY. N.Y., Duell, 1944. 283 p. 138 K13  
"Drawing on a background rich in folklore, anecdotes, and colorful detail, on the hydraulics and physics of the Father of Waters, and on files of historical quarterlies and engineering reports, the author records the way the dominant Mississippi River, the land, the crops--chiefly rice and sugarcane--great industries, great plantations, and little towns have come and gone through the years as land and water have changed. With the warmth and depth that the subject deserved, he manages to instill in his readers an appreciation of both past and present events, places, and people, in a setting unique in terrain and growing things which he terms 'paradise incomplete'.—"Land Policy Review.
